· **Penetration time of glove material**

For the mixture of chemicals mentioned below the penetration time has to be at least > 120 minutes (Permeation according to EN 16523-1:2015: Level 1).

The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

Value for the permeation: Level 1

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
