Freezing point/Deg C undiluted: -8

Freezing point/Deg C diluted 1:1: -4

Pack quantity: 4 x 5 Litre (20 litres total)

Description

Usage: Vehicle windscreen and headlight washing systems. It is added to water to provide a cleaning liquid used all year round, and used in different concentrations to provide different levels of frost protection to the wash system. De-icing concentrate may also be used in hand-held de-icing sprays. It is an environment-friendly premium grade screenwash and de-icing concentrate especially designed to meet the stringent performance standards of today's automotive industry.

Due to its specific formulation properties, provides maximum freezing protection, surpasses the highest cleaning standards, does not affect synthetic surfaces and can be filled in retail packaging without fire or hazard warning symbols.

- Safe and environment-friendly formulation: (contains no Methanol, EDTA, phosphates, amines or nitrites)
- High Flashpoint: both concentrate and diluted product • Cleaning performance exceeds standards set by German Institute
- Does not affect polycarbonates, lacquers or rubbers

Dilution ratios: Summer- 1 part screenwash to 6 parts water. Winter- 1 part screenwash to 1 part water.

For severe conditions use undiluted.

Label information: Keep out of reach of children. Keep container lid tightly closed, use only in well ventilated areas.

Freezing point/Deg C undiluted: -8
