
FTTP BFD/Cu Hybrid Come-Along Clamp for Copper and Fibre Drop Cable

[Product Images](#)

Product Code: S83-3583

Short Description

Overhead Cable Installation Tool used to hold and tension cable during overhead installation. As well as the grip inserts for legacy 6 to 8mm cable cables it has also been validated by Openreach to be used with the flat ROC cable from Corning and EzAxS from CommScope for FTTP deployment.

This come-along is delivered in a box with an additional pair of wedges so that the installers can change the wedges themselves when the other ones wear-off instead of buying a complete new come-along every time.

Features

Securely wraps around the pole with heavy duty 2 metre chain

Sturdy carabiners for securing and holding tension during installation

Durable construction of cable grip housing

Suitable for Hybrid Drop Tube, Copper Cable 6-8mm, Flat ROC cable from Corning and EzAxS from CommScope

Formerly S83-1541

Ref 069586
