

CommScope MFPS Modular Front Patching System

Product Images

Product Code: MFPS

Short Description

CommScope's MFPS family of solutions is specifically designed to meet the current and future challenges of your dynamic high density FTTx deployments.

The MFPS family of solutions provides a range of configurations, densities and sizes. So you have one reliable solution for all your FTTx patching applications.

The innovative modular design features stackable 40mm elements. With as many as 288 patch positions in a 3HU size, the MFPS provides best-in-class fibre density.

Yet the space-saving design also gives technicians and installers all the accessibility they need. Each shelf element swings out individually for easy maintenance while protecting all other elements.

The fibre management system secures each fibre in the tray while ensuring minimal bend and maximum optical performance.

Available in a variety of configurations and HU sizes, the MFPS family lets you easily customize your patching and splicing capabilities for each cabinet.

The MFPS family features our 48, 72 and 96 Series products, which range in capacity from 48 to 288 patch positions. Each series offers 1, 2 and 3HU modules that fit a standard 19-inch rack opening.

The number of patch positions is designed to match the fibre counts of most outside plant cables.
