

CommScope Pre-Terminated Multi-Fibre Assemblies with 2.0mm Micro Tube

Product Images

Product Code: PRETERMFIBRE

Short Description

As demand for bandwidth increases, your network requires connection solutions with higher density and more flexibility to adapt, providing higher usable density to connect active equipment with optical distribution frames in an effective manner. Supporting your network today and into the future. CommScope's pre-terminated fibre assemblies enable a wide range of connections in data centres, central offices and campus networks with options to fit almost any application.

Configurations options include:

- MPO or LC connectors
- 12-144 fibres
- Singlemode A2 Fibre
- Multimode OM4 or OM5

With a large variety of available break outs lengths, these fibre assemblies can be installed in any of the CommScope panel or optical distribution frame products.
