

CommScope NOVUX Hardened Pre-Connectorised Drop Cable

Product Images

Product Code: NOVUXPRECON

Short Description

The ultimate plug-and-play solution for cost-effective durable and reliable service connections, available

in 4-fibre breakout assemblies.

- Technician friendly to greatly simplify installation and maintenance by minimising splicing
- Available in dielectric and toneable hardened cable, with one or both ends connectorised in standard lengths, from 50 to 2,000 feet (15 to 610 metres)

FHD drop cables are ruggedly designed and hardened to protect from extreme outside plant temperatures, moisture, and chemicals.

Backward-compatible with older generations of hardened and nonhardened connector systems, FHD drop cable integrates seamlessly into existing fibre-optic networks. This series offers a large variety of cable types and innovative configurations.

All-in-one cable solution for indoor and outdoor fibre drop applications.

The universal drop cable is composed of exterior sheathing, which is hardened to withstand harsh outdoor conditions, and an inner 3-millimetre simplex cable, which is UL listed and approved for indoor use.

Transitioning from outdoor to indoor use is as simple as stripping the exterior sheathing from the drop assembly.
