

Tempo PA1594 LAN & AV Cable Check Tester

Product Images

Product Code: C00-4113

Short Description

Test the continuity of 8-way (RJ45) LAN and coaxial patch cords and installed cable runs with the PA1594 LAN/AV Cable-Check.

The PA1594 maps the cable, line by line and identifies good connections, opens, shorts, splits and crosses. Includes patch cords, adaptors, battery and carrying pouch.

Features

- Maps connector and cable pin out including shield/coax
- Tests cables up to 900ft or 300 m
- Tests standard and cross-over LAN cables
- Includes separate “test” and “debug” modes
- Automatically scans connected cable when activate
- Low battery indication
- Includes a pair of RJ45 patch cords, 75 Ω terminator, female F connector adaptor, RCA and BNC adaptors and one pair of AAA cells, all contained in a durable nylon carrying case with belt loop
- Master can be slid together with the remote
- One year warranty
