

Hyundai 2170PSI Hot Pressure Washer, 140°C, 2.8kW

Product Images

Product Code: P57-4324

Built-in detergent tank
For a deep clean

Freedom to clean large spaces
Thanks to the 5m power cable
& 10m hose

2170 PSI (150bar)
To blast away dirt &
grime quickly

140°C max temp
To sterilise surfaces &
shift stubborn dirt

**Automatic low fuel
shut-off**

**Easy-to-wheel trolley
design**

Standard 3 pin UK plug

Short Description

If you're looking for a pressure washer that is able to cut through stubborn grease, oil and thick grime, the Hyundai HY150HPW-1 Hot Pressure Washer is the product for you!

If you're cleaning oily or greasy surfaces, engines, automotive parts, lorries or even tractors, you'll need hot water. Think of greasy or oily pans in your sink - where cold water will only push the grease around and leave a residue, hot water is able to melt the grease and grime and produce a sparkling finish.

In the same vein, anything that a cold water pressure washer can do, a hot one can do even quicker, saving you time and also providing a deep clean where it is needed, which is especially good for farm machinery such as tractors, or even for creating an incredibly shiny and clean lorry fleet.

Powered by a 2800w motor, the HY150HPW-1 is able to produce an impressive 2170 PSI (150bar), which will blast away any dirt and grime quickly to save you time.

The built-in detergent tank makes this hot water pressure washer even easier to create the clean finish you want. It also has adjustable detergent delivery to fine-tune your desired clean, whether you're cleaning a factory or doing a lorry wash.

Thanks to the vertical boiler which features a high thermal efficiency steel coil, the HY150HPW-1 is able to produce water temperatures of up to 140°C, which will sterilise surfaces and clean them of any germs, bacteria or algae.

The HY150HPW-1 hot jet wash also has an easy-to-see warning light, as well as an automatic cut-off, to let you know when fuel is low. It also has automatic temperature regulation and pressure gauges so you don't have to worry about adjusting any dials whilst completing the job.

The smart design of this heated pressure washer also includes a switch that shuts the motor down on release of the trigger to prolong motor life and minimise any additional maintenance. It is also fitted with a burner regulator to improve fuel efficiency and reduce wear and tear.

The comfortable handles and sturdy wheeled design mean that you won't be straining your arms or back having to carry a heavy machine around - simply push it to where it is needed.

The 10m high-pressure hose and additional 5m power cord mean you'll be able to clean large areas such as workshops and factories, or clean around LGV, HGVs and articulated lorries easily and without having to reach for any extension cables.

This hot water jet wash also comes with a 1 year Hyundai warranty (as well as UK-based parts and service), as well as a range of accessories including a high-pressure trigger gun, 10m high-pressure hose, 700mm high-pressure lance and high-pressure professional nozzle.

Features

- 2800w / 2.8kW motor
- 2170 PSI / 150bar
- Produces water temperatures of up to 140°C to sterilise surfaces
- Able to cut through grease, oil and grime
- Built-in detergent tank
- Easy-to-wheel trolley design
- Produces high-quality clean finish
- Automatic low fuel shut-off
- Smart design to prolong motor life and increase fuel efficiency
- Includes a range of accessories
- 1 year Hyundai warranty with UK-based parts and service
