

Short Description

The Hyundai HYW3100P2 petrol pressure washer is powered by the Hyundai 212cc 4-stroke high torque, low emissions recoil start petrol engine, which is engineered to handle your toughest cleaning jobs with ease.

Easy And Effective Cleaning

The cold water, gravity-fed HYW3100P2 delivers 3100psi and a flow rate of 10L/min for quick, easy and effective cleaning of driveways, patios, vehicles, windows and other demanding jobs.

Mid Range Torque

The new 212cc engine has tremendous mid-range torque so the machine does not have to be operated at maximum revs while cleaning. This makes for a more pleasant, quieter user experience and reduces fuel consumption, whilst promoting long engine life.

Portable

The user-friendly easy start recoil engine makes jobs where no electricity is available incredibly convenient, and it's also fitted with tough pneumatic tyres which makes this a portable pressure washer.

Ultimate Protection

The tubular steel frame and anti-vibration feet provide all-around protection and stability. The trigger gun & lance rest provides easy accessibility, likewise with the built-in nozzle compartment. It's supplied with a 30ft / 10m hose.

Annovi Reverberi Pump

The Annovi Reverberi (AR) pump provides outstanding performance and reliability, with replacements pumps and spares available to maintain your pressure washer for longer life.

To aid priming when drawing water from a tank with a suction hose:

Ensure that the Suction hose is 100% sealed against air leaks – any air is drawn into the suction side of the pump will prevent the machine from priming.

Connect the pressure washer to a mains water supply and run for 1 minute to free up any sticking valves.

Position the pressure washer as close to the water supply as possible

On startup, to aid priming, prime the pump before connecting a high-pressure hose to the pump outlet.

Due to the nature of axial pressure washer pumps, these models are ideal for heavy-duty home use (domestic applications), but for commercial use, you should consider a pressure washer with a triplex style pump.

Nozzles Included

The included 4 quick connect nozzles (0°, 15°, 40° and standard soap nozzle) can also be changed quickly and effortlessly.

In The Box

4 Quick Release Nozzles

Turbo Nozzle

Trigger Gun

Lance

10m Hose with Q/R fittings

Spark Plug Spanner

Quick Start Guide

Additional accessories are compatible and available, including a snow foam lance which provides complete foam coverage of a vehicle and loosens the dirt on the exterior.

Warranty

A Hyundai 3 year platinum warranty provides complete peace of mind that in any event, you will have the back-up, parts and support you need.
