

Filoseal+ HD Duct Sealing Kit 75-110mm

Product Images

Product Code: S83-0758

Short Description

FiloSeal+HD is an engineered solution that provides a strong support system using hexagonal tubes which build up like a honeycomb structure. FiloSeal+HD is suitable for sealing any cable configuration or pipes contained in one duct and also allows easy re-entry of the seal to add or remove cables or pipes as required

The Filoform duct sealing system FiloSeal+HD uses MD+ sealant which is easily applied from a standard skeleton gun. The high quality, one component, flexible sealant "MD+" is based on a silicon compound that cures with air (Humidity).

After application and full curing the thixotropic MD+ forms a plastic elastomer mass with special qualities effectively sealing and bonding, while providing a high level of durability.

Features

Flexible, one component, adhesive and sealing compound in a cartridge -(310ml)

High levels of Gas and Water tightness

Excellent adhesion, applicable to all common building materials

Shows Fire resistance properties

Resistant against Water, Alkaline, Chemical agents

Resistant to termites (Mastotermes Darwiniensis) Northern Australian termites

Resistant to Rats

Resistant to Hydrogen Sulphide / Methane and many other Gases (NedLab)

Non corrosive Solvent free Shock absorbing

Non toxic, neutral and almost odourless

Also suitable for limiting the EX-zones during transitions (observe chemical resistance)

Suitable for any shaped duct / bore hole / opening

Quick and easy installation

A complete kit

Seals all known materials, PVC & PE sheathed cables, PILC, (HD) PE pipes

Suitable for renovations, can be installed retrospectively

Over 25 years of operational experience

Up to 110mm diameter

Please see datasheet for further details
