

Calibrator / Sponge Catcher with 8mm Air Hose Attachment & 1.5m 8/4mm Microduct

Product Images

Product Code: S00-4333

Short Description

A metal catcher designed to expel the air from the microduct, allowing the calibrator/sponge to be blown through and caught safely, minimising any risk to the installer.

For use on the calibration and testing of the 8mm microducts.

To lengthen the life of the 8mm catcher and air hose adaptor, it is advisable to keep a stub of 8mm microduct in the adaptor and use a normal 8mm connector coming from the stub of 8mm to go onto the microduct to be tested.

Contents

- 1 x Calibrator and sponge catcher
- 1 x 8mm air hose attachment
- 1 x 1.5m 8/4mm green microduct (to be used with catcher)
