
Microduct Straight Connector

16mm Pack of 10

Product Images

Product Code: Q69-4309

Short Description

Direct bury straight connector developed for use in direct buried fibre optic applications.

Features

Snag Free Design – The tube stop design reduces tube ovality and allows full tube insertion, removing this as a possible fibre snag point. This feature also allows for poorly cut tube.

- 30J Impact Resistance @-5°C.
- Minimal through bore deformation when impacted due to webbed inner connector.
- No Tube drop back.
- Simple tubular design – Stones/dirt cannot be compacted and stuck in outer profile of connector.
- Easy to wipe clean.
- Transparent body allows visual inspection of tube and fibre.
