

Omega Pole Bracket 180mm

Product Images

Product Code: S83-5088

Short Description

Pole bracket used for securing pole hardware on wooden poles used for low voltage networks.

This bracket enables the installation of various optical distribution boxes such as PC, BMC or PBO with an offset from the pole in order to manage the cable pass-through at the rear of the box.

Installation with S83-1542 20mm pole band or with a coach / lag screw.

Material: Galvanized steel

Width: 180mm
