

Prysmian Circular Port Entry Gland 2 Way 5-9mm UMJ/CMJ/MMJ/LMJ

Product Images

Product Code: XJTSC03437.

Short Description

Prysmian Circular Port Entry Glands are used to instal cables into the ports of a joint closure base. The glands are mechanical in nature and are installed onto the cable, then simply pushed into the base of the joint.

- Available in single, dual, quad and 8 way variations
- Each kit contains all necessary parts to seal the cable and secure the cable strength members
- Multi-way glands are useful when installing several smaller cables into one circular port
- For larger cables an Oval Port Kit is used

Cable Range: 5-9mm

Design: Circular Port Entry Gland

Entry Type: 2 Way

For use with: Cables or Conduit

Joint Type: UMJ/CMJ/MMJ/LMJ
