

Martindale NC2 Non-Contact Voltage Tester

Product Images

Product Code: C70-2077

Short Description

The NC2 is a non-contact voltage tester for accurately detecting the presence of AC voltages between

200V and 1000V. When voltages are detected, a bright red LED illuminates the clear tip of the NC2 and a buzzer sounds.

It will indicate approximately 4mm from a conductor at 240V AC, making it ideal for tracing live circuits within cable containment and for voltage detection in sockets and junction boxes. The NC2 can be used to differentiate between Live and Neutral wires and detect blown fuses.

The pen-shaped design with clip makes it ideal for carrying in a pocket or tool belt when working at height or in difficult to access locations. A built-in torch in the tip is ideal for use in low light areas illuminating the area under test. Other NC2 features include low battery indication and LED pulse when on.

Specifications

Indication Range 200-100V AC 40-400Hz

Voltage Sensitivity indicates 4mm approx. from a conductor at 240V AC

Indication Audible and LED

Conforms to BS EN 61010-1

Supply 2x AAA batteries (included)

Weight 55g (incl. battery)

Dimensions 155mm length, approx. 25mm diameter
