

Megger 1001-991B MFT Multifunction Test Leads

Product Images

Product Code: C72-2515

Short Description

Original Megger replacement test leads for use with Megger's MFT range of multifunction testers and come with 4mm shrouded plugs which can be inserted into the instrument. They're also compatible with other multifunction devices that have the correct jack and should plug into other of the manufacturer's products without any problems.

The test lead set comprises three leads in red, blue and red colouring. The leads are unfused and 1.2 metres in length. Each lead comes with its own colour-coded probe-tip and crocodile clip, enabling the use the multifunction tester in a wide variety of locations.

Features

These test leads are replacements for Megger's range of multifunction testers

Colour - red, blue and green

Compatible tips - 1000-562 GS38 probe tips

Unfused

Complete with Crocodile Clips

Instrument end - 4 mm plugs

Length - 1.2 m

Test end - 4 mm safety probes and croc clips
