

# Seaward Solar Utility Pro Complete Kit

Product Images

Product Code: C72-1979

Laptop not included

## Short Description

The new Solar Utility Pro from Seaward takes PV testing to the next level. With the introduction of more efficient 1500V modules and inverters for an easy to use and robust tester with 1500V capabilities.

Its market leading 40A current capability enables the Solar Utility Pro to test parallel wired strings up to a maximum of 1500V / 40A, eliminating the time consuming task of separating strings to keep within lower limits of other instruments.

A single press of the Test button will give values for Open Circuit Voltage and Short Circuit Current, and when paired with the Seaward Solar Survey 200R irradiance meter, will also record irradiance, module and ambient temperature measurements. The large internal storage memory can record up to 999 complete record sets, which can be downloaded as a CSV file to a PC for review.

To make on site testing easier, the Solar Utility Pro is supplied with 1.5M long conversion leads that convert the standard MC4 leads to alligator clips – particularly useful in combiner boxes and junction boxes.

These features, in a rugged enclosure, give the larger scale PV engineer the most efficient, portable and

2

highest rated tester available.

### Features

- Test multiple strings in parallel up to 1500V 40A.
- Test at a string level or in the combiner box.
- Record up to 999 full sets of string data.
- Test open circuit voltage (Voc), short circuit current (Isc), irradiance (W/m<sup>2</sup>), ambient temperature & more.
- Free product and O&M training with every purchase.

**Please see datasheets for full specifications**

## Description

---
