

## Short Description

---

Supplied in a durable impact resistant steel cylinder with a 1" thread size, this propane gas cylinder possesses a high flame temperature of up to 1995°C, making it suitable for a range of general purpose soft soldering and brazing tasks. As the industry norm for soft soldering, Propane is excellent for use particularly in domestic settings where space can be restricted. The cylinder's 1" thread makes it compatible with the popular Rothenberger torches, such as the S99-7386 SuperFire 2.

### Features

- Ideal for soft soldering and some brazing tasks making it suitable for at home use
- Produces a high working temperature of up to 1995°C for faster working speed
- Pure composition encourages a longer torch life
- Compact design

### Notes

- Non-refillable
- Cylinders can be vented after use with vent key then disposed of as scrap steel.
