

Heightec P02 Aluminium Rescue Pulley - Alloy 5cm

Product Images

Product Code: S83-1106

Short Description

Lightweight, compact swing cheek pulley for general or personal use.

The 5 cm aluminium rescue pulley is a single sheave, rescue pulley.

Features anodised aluminium alloy side plates for corrosion resistance and nylon pulley wheel.

The aluminium rescue pulley also features wide opening swivelling plates for easy attachment to rope.

The large attachment point of the pulley can accommodate up to three connectors for complex rigging systems.

Self lubricating bearing.

The large diameter sheave of the pulley increases the mechanical efficiency.

To use with 13 mm diameter or smaller rope.

P02 rescue pulley is also a featured product in heightec's lifting kits:

Basic Lifting Kit (WK52) – a complete lifting kit for hauling, designed to lift small to medium sized loads and ideally suited to the renewables, construction and telecoms industries. Also includes the CYCLONE hauling pulley.

Advanced Lifting and Lowering Kit (WK55) – complete kit for rigging and light lifting of small loads.

Features the PRISM rope control device with hands free locking function and HURRICANE hauling device.
