

Heightec WK16 WTG Wind Turbine Climber Kit International - Standard

Product Images

Product Code: S83-1113

Short Description

Off the shelf climbers kit for WTG technicians includes the new ELITE twin lanyard.

The WTG Wind Turbine Climber Kit (International) contains high specification equipment specifically designed for the demanding environment of offshore and onshore wind industry.

At the heart of the work kit is the VORTEX WTG harness with integrated waist belt and rear attachment point raised to limit chafing on the back when climbing ladders with back against the wall. It is also well positioned for a confined area rescue from the front of the nacelle if needed.

Heightec's Wind Turbine Climbers Pro safety kit also includes the new ELITE Twin lanyards with alloy locking connectors with 60 mm opening and 16 kN cross gate strength. Specifically designed to minimise the consequences of a fall that side loads the connectors.

This work kit also includes the DUON-Air technical safety helmet. This allows for:

- Total compliance for complex environments with ever changing hazards
- Full adaptability with configurable chinstrap and vents
- Exceptional fit and stability with a unique adjustment system
- Complete versatility; compatible with a full range of accessories including Visor

The PIRANHA work positioning lanyard for work positioning is also included.

The WTG Climbers Kit (International) contains everything needed to climb and work in the offshore and onshore wind industry (except for the vertical fall arrest traveller which is specific to each WTG).

All work kits come complete with the versatile KARI transport bag (B30 – WLL 18kg). Heightec's KARI bag range is tough, waterproof and suitable for storage and hauling. Designed specifically for work at height and rescue, the KARI transport bag range brings all the features of traditional dry bags but with increased protection.

Harness size options: standard or large.

Features

- VORTEX WTG Full Body Harness
- DUON Climbers Helmet (EN12492)
- ELITE Twin Lanyards (60mm opening, 16kN cross gate strength)
- Piranha Rope Adjuster
- Sling, Nylon, Protected, 60cm
- Head Torch
- Durable 30L KARI 30 (WLL 18kg)
