

Heightec WK112 Rigger's Tower Climbing Kit Neon - Standard

Product Images

Product Code: S83-1111

Short Description

The Riggers Tower Climbing kit is a versatile combination of equipment which allows for work positioning and fall arrest.

The NEON harness structure ensures good fit with maximum comfort and security. Chest rings and articulated hip section with floating belt attachment aligns the webbing to for optimum fit and freedom of movement.

Also in the Riggers Tower Climbing Kit is the ELITE twin lanyards for continuous attachment while climbing. The rope material gives a high level of resistance to abrasion and cutting. The large central ring proves a straightforward place to “park” an unused lanyard.

The PIRANHA adjustable lanyard allows precise positioning and can be operated with one hand.

Features:

DUON-Air technical safety helmet

Total compliance for complex environments with changing hazards

Full adaptability with configurable chinstrap and vents

Exceptional fit and stability with a unique adjustment system

Complete versatility; compatible with a full range of accessories

NEON harness

Chest rings for comfort and freedom of movement

Large lumbar support pad for high level comfort and support during positioning

Adjustable harness structure ensures good fit with maximum comfort and security

Integral lanyard parking points

Core components:

DUON-Air helmet EN 12492
NEON full body rigger's harness
ELITE twin lanyard 1.25 m
PIRANHA adjuster for positioning or restraint 2 m
Durable 30L KARI 30 (WLL 18 kg)

All work kits come complete with the versatile KARI transport bag (B30 – WLL 18 kg). Heightec's KARI bag range is tough, waterproof and suitable for storage and hauling. Designed specifically for work at height and rescue, the KARI transport bag range brings all the features of traditional dry bags but with increased protection.

Harness size options: standard or large.
