

RidgeGear RGH16 Multitask Comfort Harness - Standard

Product Images

Product Code: S83-1045

Short Description

A multitask safety harness which has undergone a revolution, perfect for pretty much any working at height related tasks due to a vast array of innovative features.

It truly represents the culmination of years of research and design development, making it one of the most advanced and feature packed harnesses available on the market.

This five point harness comes with the usual front and rear attachment points, but also comes with the added extras of a two point work positioning belt and ventral connection point.

The lumbar supporting belt ensures optimum comfort when working for long periods of time. Whether the user needs to be hands free using the the connection points on the belt or using the ventral attachment for sit suspension.

This comfortable harness is perfect for operatives who are required to work at height or in exposed areas for prolonged periods of time. The unique design allows the shoulder straps to follow the user's movement.

The addition of easy to use tail tidies means excess webbing won't hinder the user during work.

Features

- Front, rear, side & ventral attachment points
- Waist, leg & shoulder support pads
- Rip stitch fall indicators
- Adjustable fast fit buckles on leg and front chest straps
- Tool loops
- Double front waist adjustment
- Rear waist adjuster for repositioning of side D rings
- Tail tidies

Accredited to: EN 361:2002, EN 358:2018, EN 813:2008 (approved to maximum user weight of 140kg)

Weight: 2.1kg

Max User Weight: 140kg (when the max. force on the user/anchor is limited to <6kN)

Material: 45mm water repellent polyester

Fittings: High tensile steel adjusters, Aluminium lightweight D rings
