

Ultracrete QC6 Surface Reinstatement Concrete Pre-mix - 56x 25kg Bags

Product Images

Product Code: S00-4034

Short Description

QC6 is a non-shrink concrete designed for the surface reinstatement of 'picture frames' of fillets around access covers and surface areas around street furniture. This shrinkage compensated reinstatement concrete has an excellent workability and sets in just 15 minutes thus difficult to deface, improving public image and limiting asset liability.

Features

Workability: 5 – 10 minutes

Depth: 12mm – 100mm

Open to traffic in 4 hours

57N/mm² compressive strength at 28 days

BT Approved

Approved for use on the London Underground and Overground

Supplied on a pallet of:

56x 25kg bags

Please see datasheet for further details
