

Megger KC50E Wind Turbine Lightning Protection Low Current Extension Lead 50m

Product Images

Product Code: C00-0116

Short Description

The KC50E is an extension reel to fit either the KC50C or KC100C lead sets.

One end of the test lead is fitted with an IP54 rated male connector and the other is fitted with a female connector. When the two are joined and locked together the connector becomes IP68 rated.

In use the extension reel would be unwound first, the cable disconnected from the from cable drum, and then connected to either a KC100C or KC50C. The cable can then continue to be paid out in the normal fashion.

Test cable diameter 6 mm

Length: 50 metres

Weight: 4.42kng
