
Hyundai Pair of Folding Aluminium Loading Ramps, 225cm Length x 28cm Wide - Capacity 340kg

[Product Images](#)

Product Code: S00-1530

Short Description

Lightweight, compact yet incredibly robust loading ramps, ideal for loading machinery into your trailer, van, lorry or pickup truck.

Each ramp is 225cm when fully extended and approximately 112.5cm when folded and has a track width of 28cm and an approximate weight of 7kg.

Lightweight and Compact Loading Ramps

This pair of loading ramps have been constructed from lightweight aluminium and have a unique folding design, making them extremely portable and easy to store.

Loads Up To 340kg

The unfolded length of these strong ramps provide the optimum angle for easy and strain-free loading up to 340kg/750lbs on and off trailers and other transport vehicles.

Multi-Purpose Loading Ramps

These two ramps can be used with rammers, compactors, etc as well as ATVs, UTVs, quad bikes, lawn mowers, wood chippers, log splitters, petrol generators, cement mixers, wheelbarrows and any other small-tyred items weighing 340kg or under.

Smart Design

Featuring anti-slip protective soft-tipped loading points, this reduces abrasion between your transport and the ramp and also provides good performance in resistance to pressure.

Features

Ideal for loading small-tyred vechines, machinery or waste into your trailer, van or truck

Can handle loads up to 340kg / 750lbs

Each ramp is 225cm long when fully extended: Optimum angle for easy loading

Lightweight and foldable: Space-saving and weighs just 7kg

Anti-slip soft-tipped design: Increases stability and reduces damage to your transport

Multi-purpose: Can be used with quad bikes, lawn mowers, wood chippers, generators, cement mixers, wheelbarrows and any other small-tyred items
