

Presswrench Waterpump Pliers 250mm

Product Images

Product Code: E12-7535

Short Description

A powerful, precise adjustable tightening tool for parallel, full faced, zero backlash and therefore firm gripping of multisided objects without harming of edges of sensitive components.

Features

Infinite parallel shiftable, smooth jaws for gentle gripping or powerful pressing and especially axial fitting

Fine push-button adjustment of all wrench sizes for hand-friendly position of grips and best ergonomics

High gripping force due to transmission > 10:1

Quick ratchet-like tightening or loosening of nuts and bolts by slight opening of jaws, twisting and regripping

Scale for presetting proper widths of jaws or measuring of diameters of tubes and polygons

Jaw capacity 52mm (2")

Length: 250mm
