

Easi-Dec Ladder Spurs

Product Images

Product Code: S00-1015

Short Description

Easi-Dec steel ladder spurs increase the base width of your ladder and minimise the chance of the ladder slipping sideways.

Spurs can be quickly and easily fitted to the base of the ladder to increase width by 750mm. What's

more, the spurs can be independently fitted at any height to accommodate uneven ground, and eliminate the need for another worker to foot the ladder.

At just 5kg, the Ladder Spurs are incredibly lightweight and can be easily transported from site to site.
