

Jonard RTC-2640 360° Rotary Duct & Tube Cutter - 26-40 mm

Product Images

Product Code: E00-8100

Short Description

Designed to ring large HDPE or other similar fibre optic ducts, this rotary duct and tube cutter is perfect

for making circular cuts in large fibre ducts without damaging the fibre inside.

Features:

- High carbon steel circular blades cut through HDPE or other similar materials with ease
- Makes circular cuts in fibre optic ducts and tubes up to 1.5" (40 mm) in diameter
- Ergonomic handles provide extra leverage when ringing fibre optic ducts
- Carbon Steel construction provides high durability and long life

For duct diameters: 1"-1.5" (26-40 mm)
