The Mechanical entry glands are used to install cables into one of the entry ports of the UMJ, CMJ, MMJ base or LMJ base A range of glands are available to allow between one and eight cables to enter through an individual entry port.

Kit Contents

1

- The kit contains all of the parts necessary to seal the cable and secure the strength members
- The kits are supplied in fully recyclable bags
- Technical data

4 Way Mechanical Cable Entry Glands

Mechanical entry glands are used to install up to four cables into one of the entry ports of the UMJ, CMJ, MMJ base and LMJ base. The glands can be installed onto the cable and then are simply pushed into the base of the joint.

Blank plugs are provided to seal unused entry holes. These can be removed when a cable is ready to be installed. The typical weight of a kit is 83 g.
