

Port Opening Tool for Hellerman FDN/FRBU Closures-B/S, SD, RD, ST

Product Images

Product Code: C00-3526

Short Description

Technical Description

The FDN/FRBU Port Opening Tool Kit provides a safe, quick and easy use solution for opening the round ports on the 16/59 Port FDN and FRBU 16/13 Port Dome Closures.

The port opening tool kit is supplied with a single handle and 5 cutter assemblies for opening S/B, SD, RD, BD and ST ports (see base diagrams for port identification).

The cutter assemblies are replaceable parts which can be purchased separately once the original assemblies have reached the end of their life.

Features & Benefits

- Single Handle manages a range of cutter assemblies
- Quick and simple assembly changeover
- Smooth consistent cutting action
- Supplied with B/S, SD, RD, BD and ST Cutter Assemblies
- Replacement cutter assemblies available separately
