# Port Opening Tool for Hellerman CFN Closures-B, D, R, S

Product Images

Product Code: C00-3527

---

## Short Description

---

### Technical Description

The CFNIR Port Opening Tool Kit provides a safe, quick and easy to use solution for opening the round ports on the CFN Dome Closures.

The port opening tool kit is supplied with a single handle and 2 cutter assemblies for opening R/D ports and S/B ports.

The cutter assemblies are replaceable parts which can be purchased separately once the original assemblies have reached the end of their life.

### Features & Benefits

Single Handle manages a range of cutter assemblies

Quick and simple assembly changeover

Smooth consistent cutting action

Supplied with R/D and B/S Cutter Assemblies

Replacement cutter assemblies available separately
