

Loose Tube Pre-Terminated Fibre Cable

Product Images

Product Code: Loose Tube

Short Description

A loose tube fibre optic cable is a type of optical fibre cable commonly used in outdoor applications such as long-distance telecommunications, oil and gas pipelines, and security systems. Unlike tight buffered cables, loose tube cables have individual fibre strands that are loosely held within a protective tube made of plastic or gel material. This design provides additional protection against moisture, temperature changes, and other environmental factors. Loose tube cables are known for their durability and ability to

withstand harsh outdoor conditions.

Description

A loose tube fibre optic cable is a type of optical fibre cable commonly used in outdoor applications such as long-distance telecommunications, oil and gas pipelines, and security systems. Unlike tight buffered cables, loose tube cables have individual fibre strands that are loosely held within a protective tube made of plastic or gel material. This design provides additional protection against moisture, temperature changes, and other environmental factors. Loose tube cables are known for their durability and ability to withstand harsh outdoor conditions.

Applications

- Indoor & Outdoor
- Inter-cabinet Links (Data Centres)
- Cable trays or ducts
- LAN & WAN Backbones
- FTTX
- Telecom access lines

Features

- Lightweight for easier installation
- Water-blocking design
- Available with 900µm, 2mm or 2.4mm tails
- Made to measure to your requirements
- Manufactured in the UK
