

Mil-Tac/Re-deployable Pre-Terminated Fibre

Product Images

Product Code: Mil-Tac/Re-

Fibre

Short Description

Mil-Tac or re-deployable fibre optic cables are specialised fibre optic cables designed for military and rapid-deployment applications where fast and reliable communication is essential. These cables are typically compact, lightweight, and easy to transport, making them ideal for use in harsh environments such as battlefields, disaster zones, and other emergency situations. They are built with ruggedised materials to withstand extreme temperatures, moisture, and physical shock. Re-deployable fibre optic cables can be quickly

installed, dismantled, and reinstalled in different locations, making them a versatile and reliable choice for military and other demanding applications.

Description
