Steel Tape Armoured Pre-Terminated Fibre

Product Images

Product Code: Steel Tape

Fibre

Short Description

A steel tape armoured fibre optic cable, also known as STA cable, is a type of optical fibre cable that is designed for rugged environments where protection against physical damage is essential. These cables have a central tube containing individual fibre strands that is wrapped with a layer of steel tape, which provides additional protection against crushing, impacts, and other types of physical damage. The steel tape layer is then covered with a tough outer jacket that is resistant to moisture, UV radiation, and temperature changes. STA

cables are commonly used in applications such as power distribution, railways, and offshore oil and gas platforms, where they need to withstand harsh environmental conditions.

Description

A steel tape armoured fibre optic cable, also known as STA cable, is a type of optical fibre cable that is designed for rugged environments where protection against physical damage is essential. These cables have a central tube containing individual fibre strands that is wrapped with a layer of steel tape, which provides additional protection against crushing, impacts, and other types of physical damage. The steel tape layer is then covered with a tough outer jacket that is resistant to moisture, UV radiation, and temperature changes. STA cables are commonly used in applications such as power distribution, railways, and offshore oil and gas platforms, where they need to withstand harsh environmental conditions.

Applications
• Indoor & Outdoor
• Harsh environments
• Suitable for direct burial
• Inter-site connections

Features
• Excellent crush resistance
• Rodent resistant
• Available with 2mm or 2.4mm tails
• Made to measure to your requirements
• Manufactured in the UK
