

# Tight Buffered Pre-Terminated Fibre Cable

## Product Images

Product Code: Tight

## Fibre Cable

## Short Description

Tight buffered fibre optic cable is a type of indoor optical fibre cable that has a protective coating around each fibre strand to prevent damage. They are grouped together in a single cable and protected by an outer jacket. This offers flexibility, ease of termination, and high tensile strength, making them suitable for applications that require frequent handling or movement. They are cost-effective and reliable for high-speed data transmission.

## Description

---

Tight buffered fibre optic cable is a type of indoor optical fibre cable that has a protective coating around each fibre strand to prevent damage. They are grouped together in a single cable and protected by an outer jacket. This offers flexibility, ease of termination, and high tensile strength, making them suitable for applications that require frequent handling or movement. They are cost-effective and reliable for high-speed data transmission.

### Applications

- Indoor & Outdoor
- Inter-cabinet Links (Data Centres)
- Cable trays or non-submerged ducts
- Central office interconnections

### Features

- Lightweight for easier installation
- Available with 900µm, 2mm or 2.4mm tails
- Made to measure to your requirements
- Manufactured in the UK
