

Crimper Plier Set, 0.08-16mm²/AWG 30-5

Product Images

Product Code: E00-0136

Short Description

- Max Crimping Range-Suits for 0.08-16mm²(30-5AWG) insulated/non-insulated wire ferrules. Got a WIDER crimping range than similar ferrule crimping tool. Also lightweight and low grip needed.
- 1200PCS Bootlace Ferrules-Equipped with 9 different sizes PVC flame retardant terminals, they are made of high quality copper with a tinned surface. Keep the high electrical conductivity and also not easily oxidised.
- Precise Crimping- Crimping tools adopts ratchet-type design. It can automatically adjust itself to the appropriate diameter for crimping terminals. Then the lever allows for optimal power transmission. Large crimping force but only need low hand grip force. Simple to use and greatly improved the accuracy and reliability of crimping.
- Longer Service Life-Bootlace ferrule crimping tool are made of high-strength special steel crimping mechanism. For consumable parts; such as springs have been upgraded to premium material. Saves effort and also reduces the loss of pliers per crimping. Prolong the pliers service life.
- Adopts ergonomic handle design and thickening non-slip nylon, the sleek shape of handle make handling more comfortable. Light weight and comfortable.
- All the crimping tool set have been calibrated in the factory before shipment, to make sure precision crimping. Preciva professional crimping tool not only suit for household wire crimping, but also for industrial wire work.
- The pliers come with an adjustable pressure ratchet. If you feel that takes too much effort to crimp, please adjust in the "-" direction, if the crimped terminal is not tight enough, please adjust in the "+" direction.
