

Mills Probe Pole Tester

Product Images

Product Code: S13-0806

Short Description

A specialist tool to detect external decay on wooden poles. The tool has a 150mm hardened blade with a ring milled 30mm (1 1/4") from the end of the spike, to easily and quickly indicate signs of rotting or decomposition of the pole.

For repetitive operation, the tool further benefits from a bi material handle.

Overall length 250mm.

Includes protective spike sheath.

Ref 122540
