

Radiodetection SPX S18 Sonde 33kHz

Product Images

Product Code: S83-2669

Short Description

A battery operated transmitter used to indicate its position after being inserted into underground ducts, drains or sewers. Typically attached to ducting rods for insertion and then located using a CAT locator.

Depth 3.5m

Description

This is a self-contained, battery-operated sonde, measuring 0.70" x 3.22" (18mm x 82mm).

It can be connected to duct rods for locating pipes and ducting etc.

It transmits on 33kHz and can be normally located to a maximum depth of 13' (4m).

For use with 9, 11 and 14mm cobra rods

Model: 10/SONDE-S18A-33
