

Brother Flexible ID TZe-FX241 Tape 18mm White

Product Images

Product Code: C92-4966

TZE-FX241

Short Description

Primarily designed for the use in the identification of cables and fibre, this 18mm TZe-FX241 labelling

tape has been rigorously tested by Brother to ensure you can print ID labels quickly and efficiently.

Suitable for use in Internal, External Overhead and Underground copper cable identification.

Developed with a special adhesive that allows labels to be easily applied to cable, PVC tubing or anything else cylinder-shaped, the Brother TZe-FX241 black on white labelling tape is also suitable for use on other tightly curved surfaces such as pipes and conduits. Your label can either be wrapped repeatedly around the cable, or stuck to itself in the style of a flag.

Compatible with a wide range of our P-touch printers, our replacement laminated labels have been developed to last, and are able to withstand extremes of temperature, sunlight, water, chemicals and abrasion.

18mm wide, 8m long
