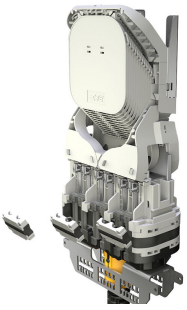
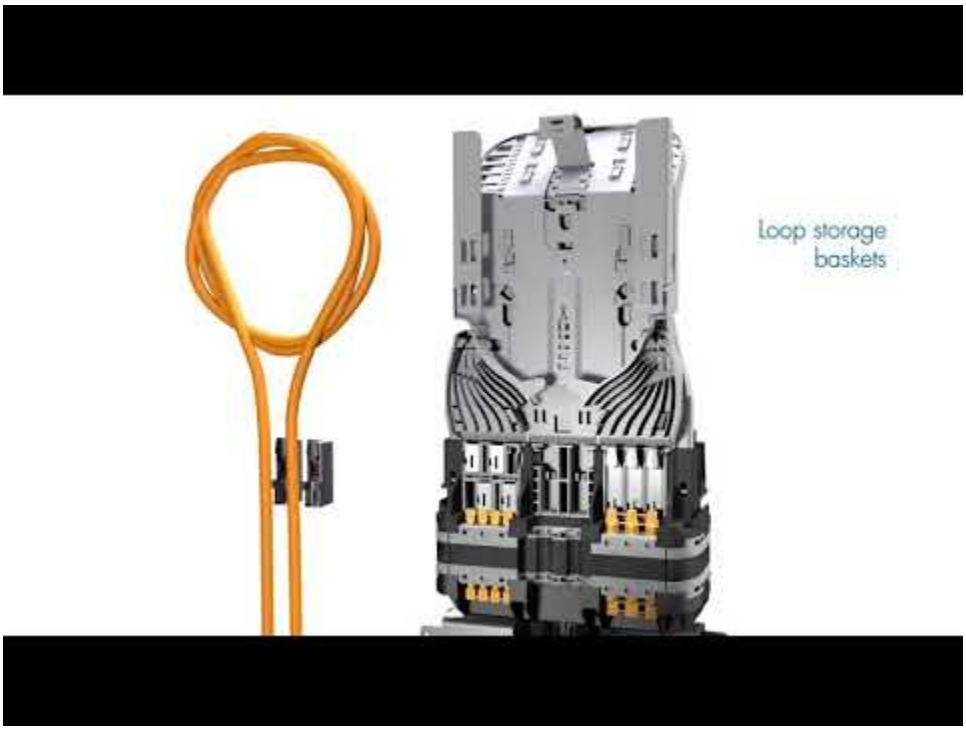
CommScope TENIO External Fibre Optic Splice Closures

Product Images

Product Code: TENIO





Short Description

Building on almost 30 years of innovation and industry leadership, CommScope’s new TENIO closures enable 30-percent faster, future-proof network deployments in 30-percent less space. TENIO closures feature modular building blocks and combine proven fibre management hardware with a new sealing system to simplify training and reduce inventory. The closure’s 100-percent mechanical, tool-less and intuitive design facilitates lower-skilled network deployments. Full modularity of the closure platform supports a phased CAPEX network deployment scheme, reducing up-front CAPEX investment.

Designed for use with any cable construction (loose buffer tube, central core tube, loose fibre), the closures deploy in any environment (aerial, pedestal, handhole, manhole) and CommScope’s superior gel-sealing technology guarantees sealing regardless of cable type and form.

Description

Building on almost 30 years of innovation and industry leadership, CommScope's new TENIO closures enable 30-percent faster, future-proof network deployments in 30-percent less space. TENIO closures feature modular building blocks and combine proven fibre management hardware with a new sealing system to simplify training and reduce inventory. The CommScope closure’s 100-percent mechanical, tool-less and intuitive design facilitates lower-skilled network deployments. Full modularity of the closure platform supports a phased CAPEX network deployment scheme, reducing up-front CAPEX investment.

Designed for use with any cable construction (loose buffer tube, central core tube, loose fibre), the closures deploy in any environment (aerial, pedestal, handhole, manhole) and CommScope’s superior

gel-sealing technology guarantees sealing regardless of cable type and form.
