

# CommScope FiberGuide Raceway System

## Product Images

Product Code: FIBERGUIDE

## Short Description

CommScope FiberGuide® is a raceway system designed to protect and route fibre optic patch cords and

multi-fibre cable assemblies to and from fibre splice enclosures, fibre distribution frames and fibre optic terminal devices.

The FiberGuide® system is a complete set of products designed and manufactured to ensure total off frame protection and ease of use. Basic components include horizontal and vertical straight sections, horizontal and vertical elbows, downspouts, junctions and numerous support hardware and flex-tube kits.

Available in a broad range of sizes from 2x2 through to 4x24 inch systems.

**Please see FiberGuide Brochure in the Datasheets section below to ascertain the part numbers for the particular configuration you require and contact sales for a quote.**

#### **Key features include:**

##### Speed of Installation

FiberGuide® systems feature a variety of products that allow for quick and easy installation. Express Exit™ drops as well as tool-less products including Snap-Fit™ junctions, snap-on covers and new hinged cover options save valuable time for installers.

##### Speed of Deployment

The Express Exit system enables new drops to be added or removed quickly and easily. A drop can be added into a fully loaded raceway in seconds-without cutting.

##### Raceway Flexibility

FiberGuide® features 38 support structures, over 75 fittings, multiple drop options and several other components to suit any application you create.

##### Fibre Protection

CommScope's broadband expertise translates into maximum protection for your network. Two inch (50 mm) minimum bend radius is maintained throughout the system regardless of the raceway size.

##### Strength and Durability

100% raceway reliability - stands up to any challenge.
