

Cable Window Sheath Cutter

Product Images

Product Code: E00-5752

Short Description

A simple lever operated sheath cutter design to cut a 50mm long window in fibre cable up to 12mm diameter

Produces a pre-determined sized window cut in the sheath of a fibre Pullback Cable. The window provides access to the fibre elements within a pre-installed cable.

Pullback Cable is predominately deployed in the FTTP network at Multiple Dwelling Units (MDUs) and Multiple Occupancy Units (MOUs).

Description

A simple lever operated sheath cutter design to cut a 50mm long window in fibre cable up to 12mm diameter

Produces a pre-determined sized window cut in the sheath of a fibre Pullback Cable. The window provides access to the fibre elements within a pre-installed cable.

Pullback Cable is predominately deployed in the FTTP network at Multiple Dwelling Units (MDUs) and Multiple Occupancy Units (MOUs).

- Enables access to the individual fibre elements to drop off one or more customers at a single breakout point.
- Creates a 50 mm window in a multi-element internal/external pullback (typically 12mm diameter)

Features

- Anodised aluminium construction
- Non-Slip pad on base
- User replaceable blade
- Ergonomic Handle
- Manufactured and assembled in the UK

Dimensions (W x H x D) 228 x 125 x 90mm

Weight (g) 725
