

Mills Splicing Worktray Pole Mounting

Product Images

Product Code: C00-5919

Short Description

The Mills Work Tray Pole Splicing has been specifically designed to assist engineers with installation and

maintenance of BDUK Pole Fibre Distribution Points (FDP's)

The Work Tray Pole Splicing is manufactured from 2mm steel and has three universal secure mounting location tabs which allow the tray to easily be attached to the pole cabinet, centrally or biased to the left or right.

The splice tray dimensions are 500mm long by 250mm wide with a 10mm lip to prevent loss of tools and materials. All corners have been radiused to prevent damage to fibre in addition to being designed to allow any excess rain water to easily drain away.

It is finished with a non-reflective black powder-coat paint.
