

Electrical Arc Flash Visor & Helmet

Product Images

Product Code: S99-4491

Short Description

Features an Arc Rating of 12cal/ cm² (ATPV according to ASTM F2178) and utilises nanotechnology to provide a clearer, more transparent window for improved visibility. The faceshield unit includes ventilation ribs that allow a natural convection air flow through the top of the face shield. This reduces fogging of the visor, lowers CO² levels and improves comfort for the user.

The assembly is also tested and certified to GS- T-29, Class 2.

Formerly S26-7927.
