
Mills Blown Fibre Duct Air Inflator

Product Images

Product Code: C00-6697

Short Description

A simple air inflator for testing the integrity of blown fibre duct installations or micro duct pressure testing. The inflator can pressurise ducts up to 12 Bar. It is supplied with a standard PCL fitting, 8mm straight thread to tube adaptor and 400mm of 8mm duct as standard. This 8mm adaptor can be adapted to fit other tube diameters, by use of the reducing adaptors shown on this page. The inflator should be used in conjunction with end caps and the S83-6189 Air Flow Gauge.
