
Subduct Pulling Eye with Clevis (Carrot) 29-37mm

Product Images

Product Code: S83-4867

Short Description

Subduct pulling eye, also known as a Carrot or Grip Threaded, with clevis pin and eye to attach draw rope etc Units are tapered and threaded. Zinc plated

Description

Designed to install polyethylene ducting using a screw-in tapered thread to grip the inner diameter of the duct. The pulling eyes are typically used to install inner duct inside a larger duct and are designed with cutting edges to actually cut a thread in the bore of the ducting, similar using a tap to cut a thread in steel. This helps to ensure a reliable grip requiring just 7 or 8 full threads of contact.

With clevis pin and eye to attach draw rope etc

Units are tapered, threaded and zinc plated
