

Tempo 930XC OTDR

Product Images

Product Code: 930XC

Short Description

The Tempo 930XC OTDR is an all in one OTDR solution featuring OPM, VFL, and SLS standard on all 930XC models.

- One button test functions
- Automatically sets test parameters for optimum test results
- Graphical interface. Easy to read, even in low or bright lighting conditions
- Up to 38 dB dynamic range. Probe longer cables and see smaller reflections
- Measure lengths and defects. Quickly locates faults
- Cable acceptance reports. Generate customised reports that include trace signature and fibre events

Available in Multimode Dual, Singlemode Dual and Singlemode Triple wavelengths with a variety of connector options.

Please see datasheet to identify the particular version you require and call sales for a quote.

Formerly C00-5483
