

Guide Beads for 2/4 Fibre Pk50

Product Images

Product Code: E00-4855

Short Description

Fibre Blowing Beads, which can be quickly and easily crimped to the leading edge ballistic fibre bundle fibre to provide smooth running of the blown fibre unit through the blown fibre microduct and minimise the risk of snagging at connector locations and joints. Beads can be applied using E72-6782 Blown Fibre Bead Crimper.

Available in 1.2mm 2/4 fibre and 1.7mm 8/12 fibre options.

Supplied in a pack of 50.
