

Blown Fibre Tracer Wire 300m

Product Images

Product Code: S00-7581

Short Description

A specialist 1.8mm blowable 300m cable with copper conductor which has been designed to assist the installer trying to trace and identify buried microducts.

The tracer wire is supplied on a standard blown fibre reel and can be used with most fibre blowing machines, using 1.8mm adaptor plates.

Once blown into the microduct the tracer can be connected to a standard Genny Signal Generator C00-7896 and identified using a standard CAT Cable Avoidance Tool C00-7895
