

Cablelay Matting Class 0 200mm x 30m

Product Images

Product Code: V03-7594

Short Description

A lightweight and flexible 6mm thick mat supplied on rolls for quick and easy installation. Cablelay Matting Class 0 for use with V01-1572 Wire Basket 200mm

Length 30m

Description

A lightweight and flexible 6mm thick mat supplied on rolls for quick and easy installation. Cablelay Matting Class 0 for use with V01-1572 Wire Basket 200mm

Wire Basket Cablelay is laid within lengths of wire basket or tray to protect cables from protrusions, sharp edges, rough surfaces and kinking ridges thus maintaining the integrity of the data cables which lay on top.

Damaged cabling considerably slows down system performance, causes loss of data and costs hours of additional work time. Our Cablelay products are designed to minimise the risk of damage often caused during installation and protects the cabling for the lifetime of the system

Quality assurance and health and safety issues are becoming increasingly more important, Class 0 Cablelay has an excellent fire safety performance complying with Building Regulations by passing both BS476 parts 6 and 7 for fire propagation and surface spread of flames.

Class 0 fire standard to meet Building Regulations for England and Wales.

Rolls are joined using Cablelay tape which maintains the Fire Standard and prevents joint movement

Length 30m
